Roberto Monte-Mór is Professor at the School of Economic Sciences and the School of Architecture, Federal University of Minas Gerais. He carried out pioneering research on Amazonia and coined the term “extended urbanisation“. Also Professor at Minas Gerais and currently International Research Fellow, Junia Mortimer works with Monte-Mór’s photographic archive assembled during his research in the Brazilian Amazon in the 1980s and 1990s. What does extended urbanisation look, feel, and sound like from within?

Research funded by Urban Studies Foundation
Event coordinated by N. Couling (AoT) & N. Bathla (UZH)
