Tobias Baitsch, [baitsch@arch.ethz.ch](mailto:baitsch@arch.ethz.ch)

This lecture series sets up the agenda for widening the disciplinary field of architecture and urbanism from their focus on the city, or the urban in the narrow sense, to wider territorial scales, which correspond to the growing scales of contemporary urbanization. It discusses the concepts of territory and urbanisation, and their implications for the work of architects and urbanists. The exam takes form of a series of A4 sheet exercises throughout the semester.
