# ADRIAN LAHOUD

ARCHITECTURE OF TERRITORY  
Ocean Territories: Geopolitics,  
Migration and Trade  
03.10.—05.12.2016  
Mon, 5.30–7 pm, ONA Focushalle

Adrian Lahoud's research sets out a philosophical, scientific architectural history of scale as a problematic, drawing on case studies of postwar urban planning, territorial governance and climate modelling. His research project on the Mediterranean Sea investigates the possibility of reestablishing the role of this ocean as a unifying territory in the age of the anthropocene.
